

Total Infrastructure: Cable

AN ESSENTIAL PIECE OF ALL CORPORATE COMMUNICATIONS

When managing an enterprise network, cable infrastructure is rarely top of mind. However, when a critical piece of infrastructure fails or the current solution can no longer handle the needs of the company, the importance of a well functioning cable solution becomes very evident. With more technologies such as voice, video and energy utilizing the IP network, the need to consistently manage and review the infrastructure throughout your enterprise becomes extremely important. For this reason, Comm-Works formed a suite of design, implementation and support services around a solid product portfolio to maximize your cable infrastructure. The end result allows you to provide reliable, consistent and steadfast communication throughout your network.

BENEFITS

Comm-Works understands that all network devices and applications depend on the fiber optics and copper wiring that they are transported across. Comm-Works has installed millions of feet of cable and fiber since its inception in 1995 and has a network of service partners that ensure a prompt, professional response for all cable infrastructure needs. Comm-Works' installers adhere to industry standards and are familiar with local and state ordinances. Comm-Works employs multiple BICSI Registered Communications Distribution Designer's (RCDD's) to ensure that low voltage networks are optimally designed and properly maintained.

Comm-Works has obtained certifications and developed partnerships with industry leading cable, fiber optic and enclosure manufacturers including, but not limited to: Berk-Tek, Chatsworth, CommScope, Corning, Hoffman and Ortronics. Comm-Works leverages these products to design and implement low voltage networks that support a vast technology portfolio, ranging from data network and wireless to voice and video communication to security and energy management. These key relationships and the expertise that Comm-Works has developed provide you with a partner that understands your cable infrastructure needs and simplifies the management of the cable infrastructure throughout your enterprise.

WHY COMM-WORKS?

Comm-Works is a leading provider of technology, infrastructure, security and energy services. As a single-source provider of your entire infrastructure, Comm-Works provides a wide range of lifecycle services for your cabling needs.

Assess & Design

Comm-Works utilizes internal experts and local technicians to conduct site surveys. Our engineers and RCDD's then analyze the site survey results and floor plans, and review with the customer to understand their current and future needs, which allows for a structured cabling design solution that meets your objectives.

Stage, Configure & Implement

Whether you need to expand an existing environment or move into a new one, Comm-Works will implement the low-voltage solution promptly and professionally. Comm-Works' implementation services leverage our network of worldwide resources to install the appropriate solution. Comm-Works' project teams leverage local resources that are familiar with local ordinances and unions, which ensures that the work meets your timeline and standards.

Support & Manage

Through our Support and Manage Lifecycle Services, Comm-Works simplifies support of your cable infrastructure by leveraging the same resources that installed the cable solution to provide ongoing support. Comm-Works' local resources are available 24/7/365 to identify and resolve any problems.

ABOUT COMM-WORKS

Comm-Works is a global technology provider for multi-site corporations and U.S. government agencies. Comm-Works offers a total portfolio of infrastructure, communications, security and energy management lifecycle services that scale to any of your locations worldwide. In order to deliver 24/7/365 services to over 200,000 customer sites, our experienced and certified engineering, project and support teams leverage a comprehensive network of qualified service professionals. Utilizing best in class tools including Web-WorksSM, our web-based project management tool, customers realize the benefits of accurate, timely and cost efficient engagements. One call. We take IT from there. Anywhere. For more information, visit us on the web at: www.comm-works.com.
