

Structured Cabling

Comm-Works' Structured Cabling offer is unique in the industry. Rather than simply installing cabling, we wrap the value in a combination of engineering, quality products and services.

Our Comm-Works team is made up of Building Industry Consulting Service International (BICSI) Certified Registered Communications Distribution Designers (RCDDs) who are experts at assessing and designing communication infrastructures. We focus on our customers' needs for throughput and performance, while guiding them to a solution that is built for their current and future needs.

Applications Focus

In order to create a resilient structured cabling design, we thoroughly assess your needs. Understanding the type of data that will be transmitted across your wired (and wireless) networks, is the key to building an efficient infrastructure. For example, systems running VoIP telephone service--even hosted--may experience quality issues that become difficult to diagnose and resolve, unless the underlying structured cabling subsystem is correctly designed and implemented. Comm-Works implementation process is exceptional. Our technicians are not only trained to install the infrastructure design precisely, but they are trained to extract cabling no longer in use. While other companies will run wires over previously installed cabling, Comm-Works does the job thoroughly.

Why Warranty Matters

We work with numerous manufacturers, each offering different warranty levels for their structured cabling products. While most cabling products offer a lifetime warranty, there are installation specifications and maintenance that need to be followed in order for this warranty to be valid.

Our CW maintenance program supplements your warranty by ensuring all changes are well documented and photographed, providing ample evidence for the equipment manufacturer.

Key Components

- Quality Products
- Assessment & Engineering
- Implementation
- Warranty
- Maintenance
- Project Management
- Documented Cable Mgmt
- 24/7/365 Support

Lifecycle

- Consultation
- Site Survey
- Design/Engineering
- Procurement
- Installation
- Certification
- Maintenance

We Offer

- Cat5
- Cat5e
- Cat6
- Cat6a
- Cat7
- Single Mode (SM) and Multimode (MM) Fiber
